

Azeem Sweis

Software Developer & DevOps Engineer

Las Vegas, NV — azeemsweis@gmail.com — (702) 487-2237 — linkedin.com/in/azeem-sweis/

Professional Summary

DevOps Engineer with experience in designing, implementing, and managing CI/CD pipelines, Kubernetes deployments, and infrastructure automation. Proficient in AWS services, container orchestration, and infrastructure as code, with a strong background in software development. Experienced in migrating applications to Kubernetes, cost optimization, and cross-team collaboration.

Education

Bachelor of Science in Computer Science and Engineering

University of Nevada, Reno

Technical Skills

DevOps Tools: Kubernetes, Terraform, Ansible, Jenkins, Helm, Kustomize, ArgoCD, GitLab CI/CD, GitHub Actions, CircleCI, Fluentd

Cloud Platforms: AWS (EKS, ECS, EC2, IAM/IRSA, S3, DynamoDB, Route53, EFS)

Monitoring & Observability: Grafana, Prometheus, VictoriaMetrics, InfluxDB, Pingdom

Programming Languages: Python, Perl, Ruby, Bash

Version Control: Git, Bitbucket, GitLab, GitHub

Methodologies: Agile, Infrastructure as Code, CI/CD, GitOps

Other Tools: HashiCorp Vault, Kubecost, Karpenter, Istio, External Secrets, Apache Airflow

Professional Experience

DevOps Engineer

April 2025 – Present

Houzz, Engineering

- Manage and maintain Kubernetes infrastructure across EKS and kops clusters, including service migrations, node lifecycle management, and cost optimization.
- Administer and troubleshoot CI/CD systems spanning Jenkins, GitHub Actions, CircleCI, and ArgoCD, supporting a 500+ repository organization.
- Develop and maintain internal developer tooling, including Slack-based automation and AI usage tracking systems, collaborating closely with developers to streamline the software lifecycle.
- Led migration of services and workloads from legacy kops clusters to EKS, including Artifactory, internal bots, and supporting services using Helm, Kustomize, and ArgoCD.
- Improve DORA metrics collection via GitHub Actions, increasing visibility into engineering delivery performance.
- Act as Release Manager for daily releases and on-call point-of-contact between the DevOps team and the broader organization.

DevOps Engineer / DevOps Specialist

2022 – Nov 2024

Vindicia - Amdocs, Research & Development

- Led the migration of applications and CI/CD pipelines from Amazon ECS to Amazon EKS, enhancing scalability and performance.
- Configured and maintained CI/CD pipelines using Jenkins, Terraform, and Ansible.
- Developed custom Helm charts and refactored Python codebases to streamline Kubernetes deployments.
- Implemented cost optimization strategies using Kubecost, autoscaling, and custom autoscaling solutions on ECS/EKS.
- Implemented RBAC for AWS/EKS accounts using IAM and HashiCorp Vault.
- Diagnosed and resolved production issues, with custom logging and monitoring configurations to minimize downtime.

Software Engineer**2021 – 2022**

Vindicia - Amdocs, Research & Development

- Maintained a large-scale monolithic Perl application.
- Developed Python Flask microservices for architectural migration.
- Managed GitLab CI/CD pipelines for automated build and deployment.
- Wrote unit and integration tests to ensure code quality.
- Utilized Terraform and Ansible for infrastructure provisioning.
- Implemented monitoring solutions to maintain application uptime.
